

# Expertise in insulation specifications

## SUMMARY

Three operators from *Nova Plant Services* will receive advanced training and upskilling in hot and cold insulation technology at IIG Group in Germany.

Nova is now positioned to assist local clients through its expertise in hot and cold insulation specifications, materials and methods, access scaffolding and industrial painting.

## Nova Plant Services

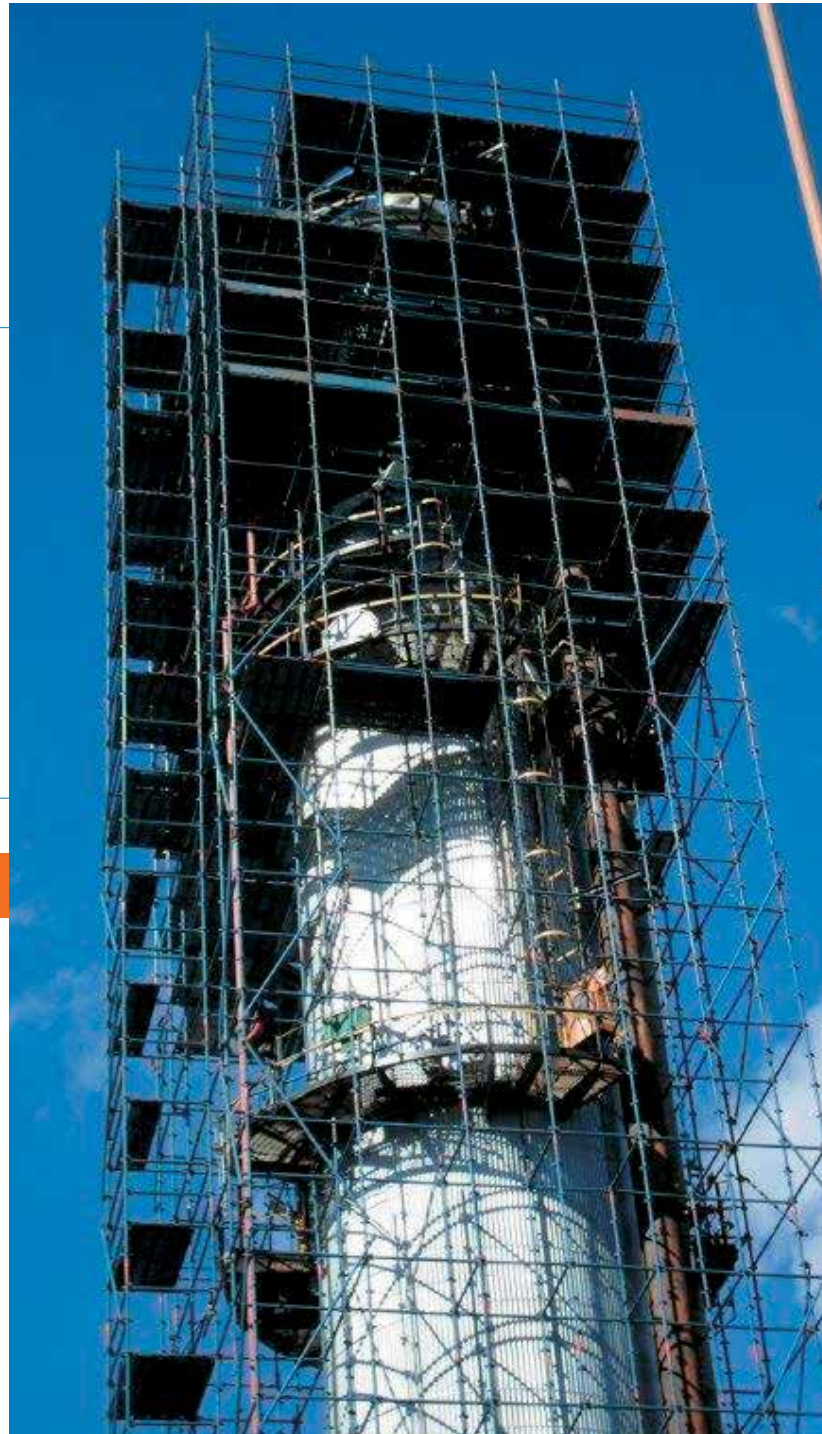

Nova is a supplier of access scaffolding, industrial painting, and hot and cold insulation services to the South African market. It has its head office in Secunda.

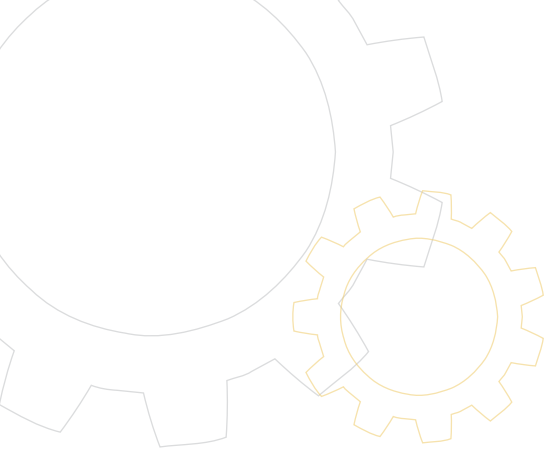

Nova is the preferred supplier to two of Sasol's main contractors, i.e. HydraAcr and Petrochemical Piping Services. Nova has performed maintenance work for Sasol and has also secured work at PetroSA.

Nova has also been contracted as a second tier supplier at Medupi to conduct all the necessary insulation work.

Nova has a joint venture with IIG, a European insulation engineering company.

# Expertise in insulation specifications

## Niche offering

Nova offers professional insulation services to infrastructure projects, notably power station build, as well as access scaffolding.

## Technology Assistance Package (TAP)

Three site managers will receive extensive insulation training, including CAD insulation design, application methods and specifications, planning, site management and various other aspects of energy conservation and acoustic insulation methods.

Five safety officers have attended management effectiveness training. They will also attend a scaffold safety and inspection course.

## Outcomes and impact

Through this combined training, NOVA staff will become experts in a unique area of insulation, materials and methods as well as on the safety aspects of scaffolding. World-best practice can be transferred locally to support the national infrastructure developments.
